**DETAILED ACTION**

1. Claims 1-28 are pending in the application.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 23 is rejected under 35 USC 102(b) as being anticipated by Kam (US 4,991,088).

Regarding claim 23, Kam discloses a method of processing data based on programmed instructions, the method comprising:

Performing vector processing operations, wherein the vector processing operations comprise a single instruction that drives calculation of a vector (see FIG. 6a, 6B)

***Allowable Subject Matter***

4. Claims 1-22, 27-28 are allowed over prior arts made of record.

Claims 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2616

5. The following is a statement of reasons for the indication of allowable subject matter: the prior arts made of record fail to teach or fairly suggest in combination referencing a number of locations in memory by forming addresses and correct buffer mapping corresponding to separate buffers in a plurality of buffers; and Communicating data from the referenced locations in memory to a processing unit, wherein the processing unit concurrently receives inputs from the separate buffers in the plurality of buffers and outputs to another buffer in the plurality of buffers.
